Trackball—20 to 6400dpi
 Current consumption— <8mA

DESCRIPTION

615 is a high quality, rackmount, 108-key keyboard with a conveniently located Microsoft compatible PS2/USB trackball.

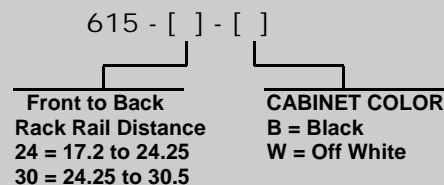

The 615 takes only 1.75" (1U) of vertical rack space and is EIA RS-310C compliant.

A unique front panel and palm rest design provides a large work area for hands and wrists without sharp edges.

615 rolls in and out on heavy duty rack slides. A built in cable follower keeps the output cable from being snagged and provides strain relief for long cable life.

The drawer locks solidly in the extended position for convenient typing. When rolled in, the drawer engages a latch that holds it closed.

ORDERING GUIDE

(Black or Off White Color are same price)
